Fahrzeuge, die in Antwerpen hergestellt werden, sind produktionsseitig mit einer Acrylharzlackierung versehen. Auf dem Typenschild ist deshalb die Bezeichnung „Acrylic“ zusätzlich eingeschlagen, damit zwischen einer Kunstharz- und einer Acrylharzlackierung unterschieden werden kann.

Besonders bei Reparaturlackierungen ist auf die unterschiedlichen Lackarten zu achten, denn jede Lackart – Kunstharz oder Acrylharz – darf nur mit ihren speziellen Materialien ausgebessert werden.

## Anlage zur Hauptgruppe 15

### LACKE/FARBEN

Neben der Anbringung des Farbcode für die Wagenlackierung auf dem Produktions-Auftragsschild – siehe Darstellung Hauptgruppe 22/23 – wird die Farbnummer für den jeweiligen Farbton in einer dreistelligen Ziffer auf dem Typenschild unten rechts gezeigt (Pfeil).

Eine eventuell vorhandene zweite dreistellige Ziffer gibt die Dachfarbe bei Zweifarbenlackierung an.

Die dreistellige Farbnummer ist identisch mit den drei letzten Stellen der Ersatzteile-Nummern für Farben, Lackstifte und Sprühdosen innerhalb der Hauptgruppen 15 und 17.
